

National workshop for Tanzania on data availability for measuring climate change with a gender dimension for better adaptation and mitigation policies

1 –2 September 2026

CONCEPT NOTE

Version of 9 July 2026

1. Introduction

A National workshop on data availability for measuring climate change with a gender dimension for better adaptation and mitigation policies will be held in Dodoma, Tanzania. The workshop will take place over two days, from 1 to 2 September 2026. It is organised by the United Nations Environment Programme (UNEP) and the United Nations Statistics Division (UNSD) in collaboration with the National Bureau of Statistics of the United Republic of Tanzania. The event is part of the Project “Measuring Climate Change with a gender dimension for better adaptation and mitigation policies” under the 17th tranche of the United Nations Development Account (DA17 project).

The goal of the national workshop is to present preliminary results of a national effort to identify and analyse existing national data sources that can be used to develop a pilot list of core gender-sensitive climate change indicators in Tanzania, and to support a national dialogue among various stakeholders on the availability and gaps in gender-sensitive climate change.

The target audience for the national workshop includes Ministries, Departments and national agencies that are responsible for collecting and disseminating data and statistics on environmental issues, climate change and gender. It also includes agencies involved in the policy formulation and implementation in these areas. Representatives from the National Bureau of Statistics of the United Republic of Tanzania; the Vice President's Office (Environment); Tanzania Meteorological Authority (TMA); Ministry of Water; Ministry of Energy; Ministry of Agriculture; Ministry of Livestock and Fisheries; Ministry of Natural Resources and Tourism; Ministry of Minerals; Ministry of Transport; Ministry of Health; Ministry of Community Development, Gender, Women and Special Groups; Ministry of Labour; Ministry of Education, Science and Technology; President's Office – Regional Administration and Local Government (PO-RALG); Tanzania Commission for Science and Technology (COSTECH); Tanzania Forest Service (TFS); National Carbon Monitoring Centre (NMC); National Environment Management Council (NEMC); research institutions; universities; local government authorities; civil society organizations; development partners; and other agencies involved in climate change, gender, and environmental statistics.

2. Content of the workshop and expected outcomes

The national workshop will introduce achievements in the area of gender-sensitive climate change statistics at the global level, as well as findings from the project exercise on identification of existing

national data sources that could be used to develop a pilot list of core gender-sensitive climate change indicators in Tanzania.

During the national workshop, the following topics will be presented and discussed:

- Global Set of Climate Change Statistics and Indicators, adopted by the United Nations Statistical Commission in 2022, implementation guidelines and Climate Change Indicators Self-Assessment Tool (CISAT).
- Mainstreaming a Gender Perspective in Climate Change Statistics.
- Experience from the Tanzania Gender and Environment Survey (TGES), 2025.
- National data and statistics available in Tanzania for gender-responsive climate change policymaking.

Expected outcomes of the national workshop:

1. Increased understanding among national stakeholders of how to measure climate change with a gender dimension for policymaking.
2. Increased awareness among national stakeholders of the availability and gaps in gender-sensitive climate change data and statistics in Tanzania.
3. Improved collaboration among national providers of climate change and gender data and statistics.
4. The work in Tanzania will contribute to global efforts to develop a list of core gender-sensitive climate change indicators, which will be recommended to all countries upon completion of the DA17 project.

To achieve the outcomes of the national workshop, presentations from national and international experts, as well as panel and open discussions, will be combined, as the opinion of every participant matters.

3. Organisation of the Workshop

The national workshop will be held in person in Dodoma, Tanzania, for two days from 1 to 2 September 2026. The UN will provide a venue for the workshop in Dodoma, lunches and coffee breaks, and reimbursement of public transportation costs in Dodoma for two days.

The National Bureau of Statistics of the United Republic of Tanzania will inform all nominated participants about the exact venue of the workshop closer to the dates.

At the end of the national workshop, all participants will be invited to complete a short post-workshop survey.
