The availability of drinking water is increased in cities **from 82% to 93.8%** (by 11,8%), In the villages **from 42.5% to 57.4%** (by 14,9%).

Access to water disposal services has been increased in cities **from 73% to 88%** (by 15%), In the villages **from 8,8% to 11,5%** (by 2,7%).

23 thousand km of networks were built and reconstructed

Wear of water supply networks decreased from 67.9% to 45.4% (by 22.5%),
water disposal from 66.1% to 61% (by 5,1%).

Grounds for making changes

1

Kazakhstan Development Strategy until 2025
(update of indicators and development policies)

INDICATOR	2016	2021	2025
Provision of centralized water supply:			
in cities	88%	98%	100%
In rural settlements	52,3%	64%	80%

2

State from the Head of the State of the Republic of Kazakhstan of January 10, 2018 *(The Government should allocate at least 100 billion KZT annually for the development of rural water supply)*

Changes in the Program

1

Revision of the goals of indicators in terms of water disposal

2

Change in the mechanism for financing projects in terms of requirements for projects, stimulating investment attraction

3

New directions for the further development of the water supply and sanitation sector with regard to the use of new technologies

Change in the objectives for the achievement of program indicators
